

ADVANCE CARE PLANNING PROVIDER INCENTIVE

Triad Healthcare Network (THN) will offer a financial incentive for creation and capture of specific Advance Care Planning (ACP) documents.

The goal of this incentive is to increase the number of patient centered conversations about their current health, goals for the future, and medical treatment they would want if their health were to decline, unforeseen illness, or if they were in an accident.

******Currently this incentive is being piloted with a few THN practices. Availability to the entire THN network will be announced after the pilot is completed.***

- Practices will engage in ACP conversations with patients and submit completed documents.
- Population: any Medicare patient within the THN network
- THN will provide training and education for the practices on how to complete MOST and Goals of Care documents as well as information on how to capture (use of a fax line, access to the Vynca web-portal or through Vynca link in Epic) these conversations.
- THN will provide a financial incentive of \$15 for each Goals of Care and \$30 for each MOST form created per patient.
